EDUCATION

Marmara University — Physics, 4th Year

SKILLS

General

Product thinking · UI/UX · Prototyping · AI-assisted production

Product & UX

Figma · Wireframing · User flows · Information architecture · Interaction design · Prototyping

Games & Interaction

Game mechanics · Game loops · Game UI/UX · Interactive prototyping

Apps & Web

React Native · Expo · Supabase · Web technologies

AI & Tools

AI-assisted research · AI-assisted prototyping · Cursor · GitHub · Vercel

Istanbul, Turkey

PERSONAL CV & PORTFOLIO

Çayan Kuzu

Product Design · UI/UX · Game Design

01 Profile

I am a fourth-year Physics student at Marmara University. I work on digital products, user experience and game design, focusing on turning ideas into tangible experiences through research, design and rapid prototyping.

Product Thinking

I consider user needs, the product's purpose, and the core flow together.

UI/UX & Prototyping

I test assumptions with early prototypes and simplify them through feedback.

Games & Interaction

I design interactions through game mechanics, game loops and player experience.

02 Projects

My strongest work across product development, UI/UX, interactive web experiences and game systems.

01 SoRita

Live

A social app for creating place cards and lists on a map, then discovering people, places and media through follows, likes, comments and sharing.

PLATFORM iOS · Android

ROLE Independent product development · UI/UX · Mobile and backend development

TOOLS Figma Make · React Native · Expo · TypeScript · Supabase · Google Maps

02 UniVerse

Live

A mobile app connecting students and clubs through events, a campus feed, event albums, following and social interactions.

PLATFORM iOS · Android

ROLE Independent product development · UI/UX · Mobile and backend development

TOOLS Figma Make · React Native · Expo · TypeScript · Supabase

03 WMatch

Live on iOS

An 18+ mobile social app that turns shared films, series, favourites and current viewing into compatibility-based matches and chat after mutual likes. Its Android release is in preparation.

PLATFORM iOS · Android

ROLE Independent product development · UI/UX · Mobile and backend development

TOOLS Figma Make · React Native · Expo · TypeScript · Supabase · TMDB

04 AudioRoom

Live · Evolving

A browser-based music experience that turns albums and singles into playable 3D worlds with distinct interaction loops and listening flows; four worlds are live and two more are upcoming.

PLATFORM Web · Desktop-first

ROLE Creative developer · Product and interaction design

TOOLS TypeScript · Three.js/WebGL · Vite · YouTube IFrame API · Vercel

05 Merbut

Live

A local two-player 2.5D browser action game that brings Hz. Ali and Samurai Jack to the same keyboard through seven biomes, enemy waves and boss battles against Aku.

PLATFORM Web · Desktop · Local two-player

ROLE Independent developer · Game design and systems

TOOLS React · TypeScript · Vite · React Three Fiber · Three.js · Zustand

06 Bibish

Live

A real-time multiplayer WebGL FPS where two teams fight for ten outposts and paintable terrain in one global room.

PLATFORM Desktop browser

ROLE Game design · Systems · 3D development · Realtime backend

TOOLS Three.js · WebGL2 · Vite · WebSocket · Cloudflare Durable Objects · Vercel

03 Production Experience

Across mobile products, playable systems, web products and independent publishing, I turn ideas into flows, interfaces, prototypes and working outputs.

MOBILE PRODUCTS

Product development from concept to release

For products focused on social discovery, campus life, cities and matching, I developed problem framing, user flows, interfaces, mobile clients and backend layers.

EtkinLink · UniVerse · SoRita · WMatch

GAME SYSTEMS

From mechanics to complete game flows

Across a multiplayer FPS, local co-op, timed decision game and cinematic knowledge game, I developed core loops, controls, level and boss flows, feedback and performance systems.

Bibish · Merbut · Son 40 Saniye · Asmaca

CARD & ARCADE

From classic mechanics to working web games

I turned card, strategy, reflex and classic game mechanics into playable projects with computer opponents, variable difficulty, scoring, keyboard and touch controls.

Card Race Game · Battleship · Papaz Kağı · Tic Tac Toe · Monster Wrangler · Catch the Clown · Snake · Burger Dog · Feed the Dragon

WEB & CREATIVE TOOLS

From products to interactive narratives and tools

I built working web experiences spanning AI, 3D narratives, music archives, interior design and portfolio presentation.

INDEPENDENT PUBLISHING

Content, visual language and distribution

I designed and published an independent publication combining writing, visual identity, and digital sales and distribution.

AtKafası Fanzin

Goals

I want to develop my product, user experience, and game design practice through user feedback and teamwork.

01 Product & UI/UX practice

Build a stronger, more consistent approach to problem framing, user flows, interfaces and testing decisions.

02 Games & interactive experiences

Keep creating new, playable prototypes focused on game mechanics, systems and player experience.

03 Validation with real users

Develop products through user feedback and usability testing rather than assumptions.

04 Rapid prototyping & AI-assisted production

Use design and technical tools to turn ideas into testable prototypes more quickly.

05 Product Development in Teams

Take part in product development within multidisciplinary teams and gain professional experience.
