EDUCATION

Marmara University

BSc Physics · In progress

SKILLS

Product and UX

Problem framing, user flows, information architecture, interaction design, prototyping

UI and design

Figma (auto layout, components, variants, variables), design systems, editorial design

Games and interaction

Core loops, systems design, game UI/UX, interactive prototyping

Technical production

React Native (Expo), Next.js, Supabase, Three.js

AI-assisted production

Cursor, Figma MCP, Figma Make, AI-assisted prototyping

CURRICULUM VITAE · OCTOBER 2026

Çayan Kuzu

Product Design · UI/UX · Game Design

01 PROFILE

Physics undergraduate combining analytical systems thinking with user-centered product design. I design and ship digital products end-to-end: from user research and interactive Figma prototypes to published App Store / Google Play apps, biomechanical CV systems and 3D web experiences. Seeking an internship or junior role in Product Design & UI/UX.

02 EXPERIENCE

Independent Product Design & Development · MeMoDe — Present

- Led end-to-end product design and store launch processes across mobile applications.
- Prepared a comprehensive 28-page investor/product deck for UniVerse covering problem, personas, competitor analysis and business model.
- Designed and built experimental systems including early tendon gesture sensing (-140ms), AI virtual try-on and 3D interior editors.
- Designed core loops, game UI/UX and systems architecture for multiplayer WebGL games.

03 SELECTED PROJECTS

UniVerse LIVE

App Store ↗ Google Play ↗

A two-sided campus mobile platform connecting students and university clubs around events and community feeds.

My role: Problem framing, user journeys, Figma UI design, mobile engineering, store releases

Figma Make · React Native · Expo · Supabase

beaTTer LIVE

Live Web ↗ GitHub ↗

A game-theoretic arena anticipating human hand gesture trajectory (-140ms early tendon detection) with physical/digital robot arm integration.

My role: Biomechanical modeling, computer vision, game theory, UI/UX & real-time interaction

MediaPipe · TensorFlow · Arduino · Web Audio · Canvas 2D

SoRita LIVE

App Store ↗ Google Play ↗

A social map application combining geographic place discovery, personal lists and user experience reviews.

My role: Product concept, geographic UX architecture, UI design and store releases

Figma Make · React Native · Expo · Supabase · React Native Maps

AudioRoom LIVE DEMO

Demo ↗

A creative web experience turning musical albums into explorable, interactive 3D worlds.

My role: Concept, spatial audio direction, 3D scene design & interface

Three.js · WebGL · Web Audio

AtKafası Fanzin ISSUES 1–2

Gumroad ↗ Shopier ↗

An independent print & digital cultural zine with two published issues, custom stickers and editorial layout.

My role: Writing, editorial & visual identity, layout design, publishing

All projects, including Zlip, WMatch, trAI, Merbut, sTressT, STROLLY and science work

fikkis.vercel.app ↗

04 ACADEMIC WORK

TÜBİTAK 2209-A research proposal

Technical and economic feasibility of a Dyson ring, structured as literature review, simulation and prototype work packages. Advisor: Caner Değer. Prepared as an application.

Document ↗ Project page ↗

Numerical study of a damped harmonic oscillator

COMP2083 Scientific Programming course project, team of four. Solved the equation of motion in Python with Euler's method, analysed how each parameter affects position, velocity and energy, and presented the results as a scientific poster.

Poster ↗ Code (Colab) ↗ Project page ↗

Jump height prediction

A comparative analysis of Gradient Boosting, Random Forest and KNN models.

Slides ↗ Project page ↗
