EDUCATION

Marmara University — Physics,
4th Year

SKILLS

General

Product thinking · UI/UX ·
Prototyping · AI-assisted
production

Product & UX

Figma · Wireframing · User flows ·
Information architecture ·
Interaction design · Prototyping

Games & Interaction

Game mechanics · Game loops ·
Game UI/UX · Interactive
prototyping

Apps & Web

React Native · Expo · Supabase ·
Web technologies

AI & Tools

AI-assisted research · AI-assisted
prototyping · Cursor · GitHub ·
Vercel

📍 Istanbul, Turkey

01

Profile

I am a fourth-year Physics student at Marmara University. I work on digital products, user experience and game design, focusing on turning ideas into tangible experiences through research, design and rapid prototyping.

Product Thinking

I consider user needs, the product's purpose, and the core flow together.

UI/UX & Prototyping

I test assumptions with early prototypes and simplify them through feedback.

Games & Interaction

I design interactions through game mechanics, game loops and player experience.

Projects

A selection of projects I developed through product thinking, user flows, interface design and working prototypes.

01

EtkinLink

Prototype

A mobile product prototype combining event discovery, participant rooms and interest-based matching.

PLATFORM

Mobile

ROLE

Product concept · User flows · UI/UX · Prototyping

TOOLS

Figma

02

UniVerse

Live

A university-focused mobile product bringing campus feeds, communities and events into one experience.

PLATFORM

iOS

ROLE

Product design · UI/UX · Prototyping

TOOLS

Figma Make

03

SoRita

Live

A social city experience connecting places, memories and people through routes, lists and sharing flows.

PLATFORM

iOS / Android

ROLE

Product design · User flows · UI/UX

TOOLS

Figma Make

04

Remember You Must Die

Live

An atmospheric interactive web experience combining music, light and space around the theme of mortality.

PLATFORM

Web

ROLE

Experience design · Interaction · Visual narrative

TOOLS

Three.js · WebGL

05

Fikkis

Live

A personal project archive bringing mobile products, web experiences, games and creative work together.

PLATFORM

Web

ROLE

Information architecture · Project presentation · Web experience

TOOLS

Next.js · Vercel

06

Bibish

Live

A first-person web game built around area control, team forts and NPC armies.

PLATFORM

Browser · Desktop

ROLE

Game design · Mechanics · Interaction · Prototyping

TOOLS

Three.js · WebGL2

Fikkis Project Archive

fikkis.vercel.app

Production Experience

My production practice across mobile products, games, web experiences, and independent publishing.

MOBILE PRODUCT

Product design and working prototypes

I developed mobile product ideas through problem framing, user flows, interface design, and interactive prototyping.

EtkinLink · UniVerse · SoRita · WMatch

GAMES & INTERACTION

From mechanics to playable experiences

Across game projects, I worked on game loops, level structures, player feedback and interaction systems.

Bibish · Merbut · Battleship · Last 40 Seconds

**WEB
EXPERIENCE**

Interactive narratives and creative tools

I combined music, narrative, three-dimensional spaces, and creative tools in interactive web experiences.

Fikkis · desAln · AudioRoom · Remember You Must Die

**INDEPENDENT
PUBLISHING**

AtKafası Fanzine

I designed and published an independent publication combining writing, visual language and a digital sales flow.

Content production · Visual identity · Publishing

04

Goals

I want to develop my product, user experience, and game design practice through user feedback and teamwork.

01 Product & UI/UX practice

Build a stronger, more consistent approach to problem framing, user flows, interfaces and testing decisions.

02 Games & interactive experiences

Keep creating new, playable prototypes focused on game mechanics, systems and player experience.

03 Validation with real users

Develop products through user feedback and usability testing rather than assumptions.

04 Rapid prototyping & AI-assisted production

Use design and technical tools to turn ideas into testable prototypes more quickly.

05 Product Development in Teams

Take part in product development within multidisciplinary teams and gain professional experience.
