EDUCATION

Marmara University

BSc Physics · In progress

SKILLS

Product and UX

Problem framing, user flows, information architecture, wireframing, prototyping

Interface

Figma (components, variants, auto layout, variables), design systems, Figma Make, Figma MCP

Games

Core loops, systems design, game UI/UX

AI-assisted building

AI-assisted development with Cursor, React Native (Expo), Next.js, Supabase, Three.js

Shipping

GitHub, Vercel, App Store and Google Play release process

CURRICULUM VITAE · SEPTEMBER 2026

Çayan Kuzu

Product Design · UI/UX · Game Design

01 PROFILE

Physics undergraduate who designs digital products from first idea to release and turns them into working products by directing AI-assisted development. I have three mobile apps live on the App Store (two also on Google Play), several web MVPs and 13 browser games. Seeking an internship in product design and UI/UX.

02 EXPERIENCE

Independent Product Designer · MeMoDe

Present

- Took mobile apps from problem framing, user flows and interface design to release, directing an AI-assisted development process.
- Designed and launched web MVPs, including an AI virtual try-on, a map-based social game and a 3D interior editor.
- Designed core loops and game systems for browser games, including a real-time multiplayer FPS.
- Created the editorial and visual identity of AtKafası, an independent zine (two issues).
- Produced a 28-page investor deck for UniVerse covering the problem, competitor analysis and business model.

03 SELECTED PROJECTS

SoRita **LIVE**

App Store ↗

A social map app that brings place discovery, personal lists and social sharing together.

My role: Product concept, user flows, interface design, release

Figma Make · React Native · Expo · Supabase

UniVerse **LIVE**

App Store ↗

A campus app that brings students and clubs together around events.

My role: Product concept, user flows, interface design, release

Figma Make · React Native · Expo · Supabase

AudioRoom **LIVE DEMO**

Demo ↗

An independent music experience that turns albums into explorable 3D worlds.

My role: Concept, experience and interface design

Three.js · WebGL

trAI **LIVE DEMO**

Demo ↗

An AI virtual try-on that shows garments on the user's own photo.

My role: Product concept, interface design, AI integration

Next.js · Supabase · fal.ai

EtkinLink FIGMA PROTOTYPE

[Prototype ↗](#)

A social events app that combines event discovery, event rooms and matching between people attending the same event.

My role: Product concept, user flows and design system; AI-assisted screen production with Figma MCP

Figma · Figma MCP

All projects, including games, web experiences, science and design work

04 ACADEMIC WORK

TÜBİTAK 2209-A research proposal

[Document ↗](#)

Technical and economic feasibility of a Dyson ring, structured as literature review, simulation and prototype work packages. Advisor: Caner Değer. Prepared as an application.

Numerical study of a damped harmonic oscillator

[Colab ↗](#)

COMP2083 Scientific Programming course project, team of four. Solved the equation of motion in Python with Euler's method, analysed how each parameter affects position, velocity and energy, and presented the results as a scientific poster.

Jump height prediction

[Slides ↗](#)

A comparative analysis of Gradient Boosting, Random Forest and KNN models.
