SKILLS

Design

Figma, UI/UX design, prototyping, design systems, user flows

Product

Product thinking, interaction design, clear problem framing

Game

Game design, level design, game UX, Unreal Engine, Blueprint

AI / Tools

AI-assisted design, MCP workflows, Cursor, GitHub

EDUCATION

Marmara University
Physics Department
3rd year student

Date
To be added

PROFILE

Independent design candidate working on digital products, interactive experiences and game ideas while studying Physics at Marmara University. Focused on turning ideas into clear flows, understandable interfaces and working prototypes.

EXPERIENCE

Current

INDEPENDENT PRODUCT AND GAME PROJECTS

Personal projects across mobile product ideas, interactive web experiences, game prototypes and product design.

Current

DESIGN PRACTICE

Ongoing interface design, prototyping and design system practice with Figma; game design learning with Unreal Engine.

Verified corporate experience will be added when available.

SELECTED PROJECTS

EtkinLink

Mobile UI/UX prototype for event discovery and interest-based matching.

UniVerse

Mobile product concept for campus feeds, communities and events.

SoRita

Mobile city experience concept based on routes, places and memories.

Remember You Must Die

Interactive web experience combining music, light and spatial storytelling.

desAln

Browser-based 3D interior planning and visualisation concept.

Bibish / Merbut

Playable web game projects exploring teams, worlds and action loops.

CERTIFICATES

No verified certificates have been added yet.
